CREATE NODE-RED SERVICE

The screenshot displays the Node-RED web interface in a browser. The address bar shows the URL: `node-red-vzyom-2022-11-05-eu-gb.mybluemix.net/red/#flow/7ddd49af21de646b`. The interface includes a left sidebar with a 'filter nodes' search bar and two categories of nodes: 'common' (inject, debug, complete, catch, status, link in, link call, link out, comment) and 'function' (function, switch). The main workspace shows a flow with two nodes: 'Hello Node-RED' (an inject node) and 'msg payload' (a msg payload node), connected by a wire. The right sidebar contains an 'info' panel with a search bar, a list of flows (Flow 1, Flow 2, Subflows, Global Configuration Nodes), and details for the selected 'Hello Node-RED' node, showing its ID as '5d727ac67b13aab0' and its type as 'inject'. A message at the bottom of the right sidebar states: 'You can manage your palette of nodes with alt-o'. The browser's taskbar at the bottom shows the system clock as 3:55 PM and the temperature as 26°C.
